

ASCENSION™

ASCENSION™ is a blend of ammonium salts, buffering agents and surfactant for use with various herbicides that recommend the use of UAN solution and a nonionic surfactant to increase absorption and uptake of the herbicide. **ASCENSION** is designed to increase the pH of the spray solution, allowing for better solubility of many herbicides, including sulfonyleurea and imidazolinone containing products, which leads to better efficacy and greater weed control.

Dry Beans

Sunflower

Wheat

Barley

Features

- pH buffering components
- Blend of ammonium nitrate salts, UAN and nonionic surfactants

Benefits

- Raises the pH of the spray solution
- Improves the solubility of sulfonyleurea chemistry
- Increases herbicide uptake into the plant, increasing efficacy
- Enhances the coverage of the spray solution on the plant tissue

Principal Functioning Agents: % by wt

Urea, ammonium nitrate and alcohol ethoxylate	68.0%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANT .	32.0%
TOTAL	100%

Mixing

1. Fill spray tank half full of water and start agitation.
2. Add herbicides as directed by the label, while maintaining agitation.
3. Add **ASCENSION** last to the spray mixture and continue agitation or follow specific tank filling and mixing information provided on the herbicide label.
