

Defend Against Plant Stress and Yield More With the Power of Employ®

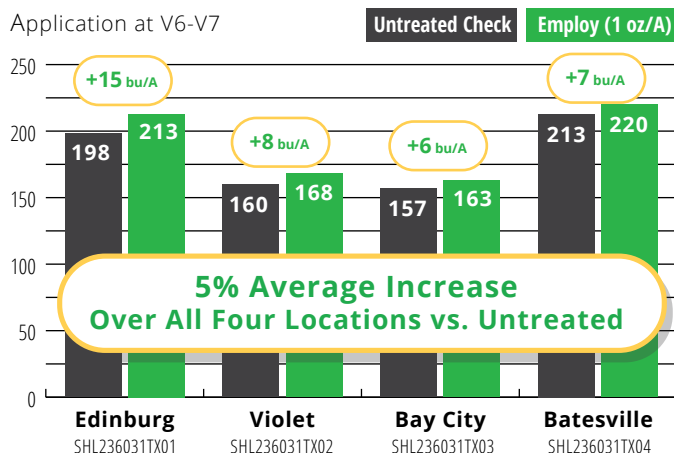

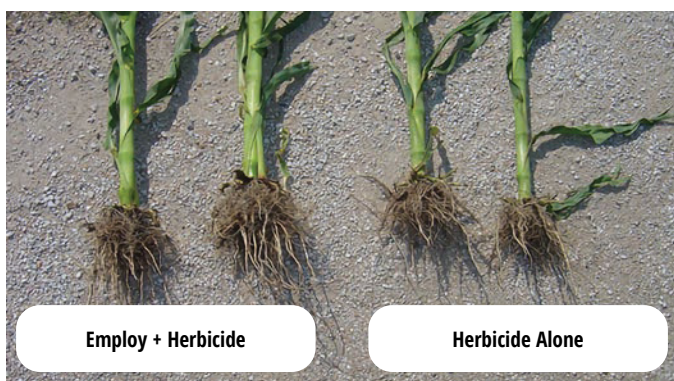

Employ®, a biochemical plant health promoter, signals plant growth and pathogen response pathways that results in improved overall yield of certain crops. When Employ is applied on plant foliage, it initiates a Systemic Acquired Resistance (SAR) response that turns on the plant's own stress defense capabilities, which results in improved root development, a reduction in abiotic and biotic stress to the plant and increased yield.

REPLICATED TRIALS SHOW YIELD INCREASE OVER UNTREATED CHECK

Corn Yield (bu/A)

Application at V6-V7

Source: Plant HealthCare – NCGA trials

EMPLOY BENEFITS

Increases average corn yield

- Application Stage: V3-R1

Activates Systemic Acquired Resistance (SAR), which signals a whole-plant response to fight off disease and insect pressure

Decreases abiotic and biotic stress increasing yield and grower ROI

No MRL restrictions and tank mix compatible with most products

Low use rate: 0.5oz - 1 oz/A

POWER THROUGH DROUGHT STRESS WITH EMPLOY

Click the QR code to view the video

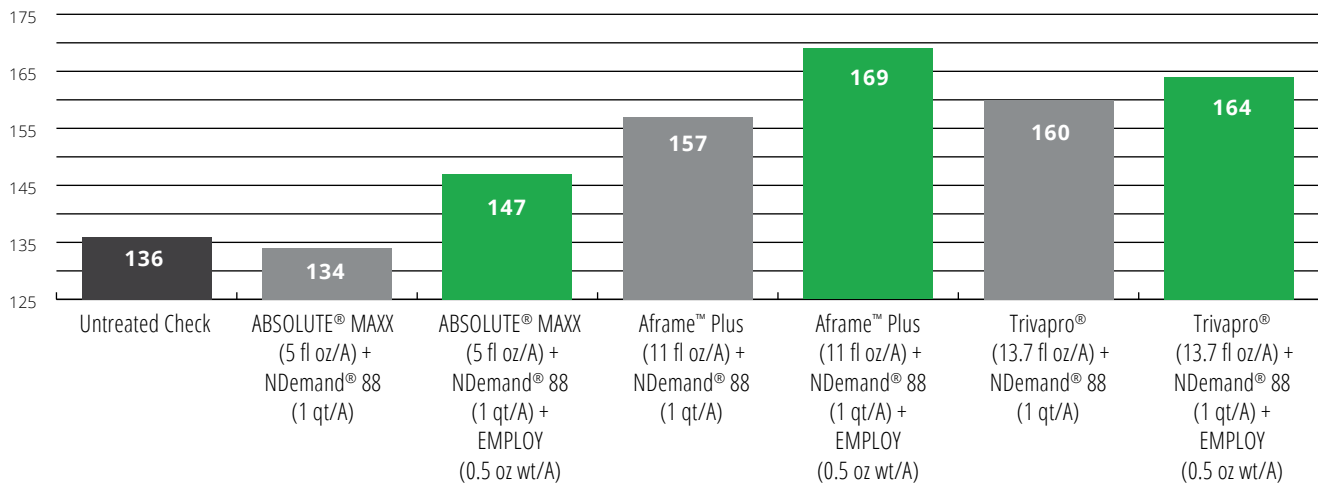

Employ is most effective when applied in early growth stages prior to stress events to turn on the plant's defense system. • • ➔

ENHANCING PRE-TASSEL FUNGICIDE APPLICATIONS WITH EMPLOY SHOWS YIELD INCREASE

Corn Yield (bu/A)

McGregor, TX | Application at V12 | SHL236031TX07

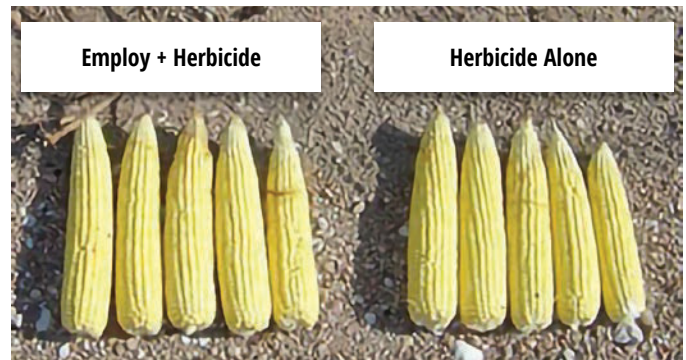

UTC **Employ** **+15%**
+24 bu/A

**On average, Employ enhanced yield
across all fungicide treatments
over UTC by 15% or 24 bu/A.**

Basic Tank Mix **Employ** **+6%**
+9.7 bu/A

**On average, Employ enhanced yield
across all fungicide treatments
over basic tank mix by 6% or 9.7 bu/A.**
