

Yield More With the Power of Employ®

Employ®, a biochemical plant health promoter, signals plant growth and pathogen response pathways that results in improved overall yield of certain crops. Employ, when it is applied on the plant foliage, initiates a Systemic Acquired Resistance (SAR) response that turns on the plant's own growth and stress defense capabilities, which results in improved root development, a reduction in abiotic and biotic stress to the plant, nematode suppression, and increased yield.

EMPLOY RESULTS IN INCREASED YIELD WHILE SUPPRESSING NEMATODES

Yield Increase

Summary across 8 trials in AR, IA, IL, IN, LA, and MS. Trials had 8 replicates.
EMPLOY® + NIS at 0.25% v/v applied at 1st bloom (R1).
Means followed by same letter do not significantly differ (P=0.10, LSD).
Return on investment (ROI) is based on soybeans at \$12.00/bushel.
Data provided by Plant Health Care.

Yield Increase Total Pod Fill Weight

EMPLOY® applied at V3-V4
in Taquaritiba, Brazil, 2020-21

Data provided by Plant Health Care.

EMPLOY BENEFITS

Increases average
soybean yield

- Application Stage: V3-R1

Activates Systemic Acquired
Resistance (SAR)—signaling
a whole-plant response
to disease, insects, and
nematodes

Decreases abiotic and biotic
stress increasing yield and
grower ROI

No AI restriction—
cost effective tank mix
partner

Early application on soybeans is better. Target the first application of glyphosate, glufosinate, dicamba, or 2,4-D to get the plant's defense system turned on.

Approved for tank mixing with Engenia®, Enlist One®, Enlist Duo®, Tavium®, and Xtendimax®.
